

# Assistive Technology Therapist

## **Our Company**

Métier Medical is an Australian Company with a strong focus on new and innovative medical device technologies.

Whilst Métier Medical develops its own brand of innovative and award winning technologies, we proudly align ourselves with other forward thinking companies to deliver the best in new and ground-breaking technologies.

The opportunity to work with the creators of the Mollii suit is nothing short of a privilege and Métier Medical is proud to bring to Australia this revolutionary neurorehabilitation device with the potential to change lives.

Mollii is an assistive device, providing a unique, mild, low frequency electro-stimulation therapy via a comfortable 2-piece suit specifically programmed to the needs of the individual.

Developed with the assistance of the most eminent Swedish research institutes, Mollii has been used in Sweden since 2010 for people with motor impairments and disabilities to improve movement with no negative side-effects. Its use throughout Europe has been increasing since 2012 and 2017 saw the launch of Mollii in Australia, by Cessnock-based company Métier Medical Ltd.

## **The Role**

We are seeking an experienced therapist that will ensure all our clients are well informed about our assistive technology therapy, provide assessments and conduct trials.

Our Head Office is located in the Hunter Valley, NSW however clinics are held at various locations around Australia, New Zealand and Asia.

Caseload will be made up of adults and children, whom you may see in their own environment, or at our clinics.

# Assistive Technology Therapist
